We entered into a cooperation agreement for the sale and servicing of machinery for the production of mink food with Scansteel Foodtech.

After many years of cooperating, CFS/GEA has decided to cease the production of mixing machines and straw cutters.

Of course we will continue servicing all CFS/GEA machines and offering spare parts for the machinery in future.

We are negotiating with Petsmo about mink food containers, pumps, etc. and with Poul Tarp weighing systems. Moreover, we offer a broad range of second hand-machines and tank vehicles.

We look forward to cooperating with Scansteel Foodtech, a company that has profound experience with machinery for pet food production and a solid team of employees who are experienced e.g. Wolfking, CFS, and GEA. Therefore, we see ourselves well-prepared for a future in the mink industry.
